

# DEEP CLEAN

## Clean Up Formulation

DEEP CLEAN is an acid-based formulation used to clean areas with soap scum, lime & scale deposits and light rust. It can be used on plastic, ceramic, porcelain, concrete, glass and most metals.

- ✓ Breaks Up Rust, Scale, Lime Deposits, Stains and Soap Scum
- ✓ Can Be Used on Plastic, Ceramic, Porcelain, Concrete, Glass and Most Metals
- ✓ Ready-To-Use Formula - No Mixing Required

## APPLICATIONS

DEEP CLEAN is a powerful clean up formulation and surface renovator. It quickly penetrates to break up lime deposits, scale, light rust, stains, mineral sediments and soap scum. DEEP CLEAN provides a powerful, rapidly penetrating cleaning action.

## DIRECTIONS

On soft metals such as chrome, copper, nickel and polished or anodized aluminum, spot test on an inconspicuous area before use. Spray, dip or brush on area to be cleaned. Scrub with brush if necessary for heavy deposits. Rinse thoroughly with water. Additional applications may be needed for heavy incrustations. **TO CLEAN ALUMINUM:** Apply with a sponge, mop or brush. Allow to stand no longer than 3 minutes, then rinse thoroughly with water. Before using on anodized aluminum, test on a small portion.

## TECHNICAL DATA

**Composition:** Biodegradable Surfactants,  
Acids  
**Type:** Acidic Cleaner, Renovator  
**pH:** 1-2  
**Flammability:** Non-Flammable  
**Appearance:** Purple Liquid  
**Odor:** None
