Areas of Use:

- Automotive Dealerships
- Car & Truck Washes
- Fleet Maintenance Facilities
- Motorcycle Dealers
- Service Stations
- Fire Stations & Police Stations
- Vehicle Rental Companies
- Municipalities
- Leasing Companies
- Automotive Detail Shops

GLOW-N-GO

Automotive Cleaner, Polish and Sealant

GLOW-N-GO is the most effective hand applied automotive cleaner developed to date. It combines the best features of a fast-acting cleaner, a high-gloss polish and a durable environmental sealer in an easy-to-use product. Carefully chosen cleaners quickly strip away pollutants and surface dirt while the natural solvent, d-Limonene, provides the strength to remove tar, gasoline spills and insect remains. A specially incorporated polish gently removes surface oxidation to produce a showroom luster. Yet this product is safe for chrome, aluminum, fiberglass and the clear coat finish of newer automobiles. Finally, a detergent-resistant, triple protection system binds to the finish to reduce the effect of weather while producing a long-lasting brilliance.

- ✓ No Water Rinsing Necessary
- ✓ Cleans, Polishes and Seals Surfaces with a Smooth, Long-Lasting, High-Gloss Finish
- ✓ Deep-Cleaning Formula Safe for All Vehicle Surfaces, Including Aluminum, Chrome, Fiberglass & Clear Coat Finishes of Newer Autos
- ✓ Effective Against Tar, Gasoline, Insect Deposits and Damaging Effects of Pollutants

APPLICATIONS

Surfaces protected with GLOW-N-GO Automotive Cleaner, Polish and Sealant are easier to clean, resist surface oxidation and corrosion and are immune to the damaging effect of salt deposits, harsh cleaners and environmental fallout (acid rain) much longer than comparable products. It combines the best features of a fast-acting cleaner, a high-gloss polish and a durable environmental sealer in an easy-to-use product. GLOW-N-GO's deep cleaning formula is safe for use on all vehicle finishes.

GLOW-N-GO is effective on aluminum, chrome, fiberglass & clear coat finishes of newer autos. The natural extract, d-Limonene, removes tar, gasoline spills and insect remains quickly. GLOW-N-GO bonds to the finish of the vehicle and protects clear coat finishes from the damaging effects of the sun, wind and rain.

DIRECTIONS

SHAKE WELL BEFORE USE. Clean and dry vehicle to be treated. Pour Glow-N-Go onto a clean, damp cloth and apply to a section at a time, using firm circular, overlapping motion. Let dry to a haze & buff off with a clean, soft cloth.

NOTE: Additional coats of GLOW-N-GO add to the deep, glass-like luster. Do not use on flat black paint or black textured paints. Always check for colorfastness of decals before application.

TECHNICAL DATA

Appearance:	Opaque liquid
Fragrance:	Citrus
Specific gravity:	1.01
Flashpoint:	>200°F
Stability:	Shake prior to use
DOT shipping:	Non-hazardous
