AIR-SAN

Ultra Concentrated Metered Air Sanitizer

AIR-SAN is formulated with a broad-range odor counteractant and air sanitizer to eliminate unwanted odors and air-borne bacteria in bathrooms, kitchens, offices, work areas and other places. AIR-SAN sanitizes the air and decreases the health risks associated with air-borne bacteria, while at the same time keeping areas smelling fresh longer by chemically neutralizing odors. Unlike other long-term products, AIR-SAN doesn't lose its strength over time. Each spray of AIR-SAN produces the same consistent air-borne bacteria fighting power as the previous one, thereby minimizing the dangers of germs spreading through the air.

- ✓ Reduces Air-Borne Bacteria, Minimizing the Health Risks Associated with Germs
- ✓ Effectively Neutralizes and Deodorizes Office, Smoke, Restroom, Garbage and Food Odors
- ✓ 30 Days of Protection - One Can Lasts 30 Days - 96 Sprays per Day on a 24-Hour Basis

APPLICATIONS

AIR-SAN is an EPA registered product designed specifically to sanitize the air and reduce air-borne bacteria. It is specially designed for use in ATCO's Auto Meter Dispenser. This dispenser actuates automatically, releasing measured amounts of millions of tiny particles which remain suspended in air. Each can of AIR-SAN lasts for 30 days when used on a 15-minute interval, effectively sanitizing the air and eliminating air-borne bacteria and virus particles, as well as smoke, office, restroom, food and garbage odors. Although versatile enough to use anywhere, suggested uses for AIR-SAN include bath and washrooms, showers, offices, garbage receptacle areas, hotels and motels, restaurants, hospitals, apartment complexes, schools, nurseries, fitness centers, theaters, commercial and institutional buildings, animal clinics, nursing homes and anywhere else air-borne bacteria and odors are a problem.

DIRECTIONS

Mount ATCO's Auto Meter Dispenser at eye level and away from doorways. Hand-spray AIR-SAN several times into the air before mounting into dispenser to prime the local area.
