BLAST-OFF

Quick-Drying Degreaser

Areas of Use:

- **Utility Companies**
- **Waste Water Treatment Plants**
- **Manufacturing Facilities**
- **City Park and Recreation Departments**
- **Construction Companies**
- **Highway Departments**
- **Repair Shops**
- **Municipalities**

BLAST-OFF is especially formulated for removing grease, grime and dirt from highly sensitive application areas, including electronic equipment, instrument controls, gears and electrical contacts. It also removes heavy grease and soils from transformers, motor or generator housings, engine parts, brake parts, power cables, precision tools, printing presses, etc.

...setting performance standards worldwide...

- ✓ **Powerful Blasting Spray Removes Tough Grease and Grime**
- ✓ **Dries Residual Free**
- ✓ **14,200 Volts Dielectric Strength**

APPLICATIONS

BLAST-OFF's powerful blasting spray quickly and easily penetrates the toughest grease and grime from equipment, tools and gears. It is non-flammable, and it has a high dielectric strength, making it non-conductive up to 14,200 volts. BLAST-OFF's formula is fast-drying, and it leaves behind no messy residue on equipment.

Areas of Use For BLAST-OFF: electronic equipment, instrument controls, gears and electrical contacts. It also removes heavy grease and soils from transformers, motor or generator housings, engine parts, brake parts, power cables, precision tools, printing presses, etc.

DIRECTIONS

Spray surface to be cleaned thoroughly. Allow product to remain on surface for several minutes. If necessary, remove residue with cloth or wire brush. For stubborn soils, repeat application after surface is dry. **IMPORTANT:** When using on any plastic or rubber surface, please pre-test product in an inconspicuous area.

TECHNICAL DATA

Composition:	Aerosol degreaser/ contact cleaner
Flammability:	Non-flammable
Dielectric Strength:	14,200 volts
Fragrance:	Slight mint
