# **GALV-A-GUARD**

**Galvanized Zinc  
Protective Coating**

...setting performance  
standards worldwide...

- ✓ **Prevents Rust Creepage**
- ✓ **Stops Corrosion**
- ✓ **Electro-Chemical Zinc Bond**
- ✓ **Economical**
- ✓ **Long Lasting**

## APPLICATIONS

GALV-A-GUARD provides a zinc film on metal surfaces that seals out moisture and prevents corrosion by sacrificial galvanic action. It is highly resistant to water, acid and salt atmospheres.

Typically used on structural steel and wire, truck and auto bodies, gutter and down spouts, boats, trailers, docks, farm and road equipment, signs, fencing, tanks, piping, fans, ducts, culverts, air conditioning units, ornamental and antique metals, dairy equipment and oil rigs.

## DIRECTIONS

Shake can vigorously. Surface must be free from all loose rust, oil, grease and old paint. Spray no closer than 10 - 12 inches from surface with a sweeping motion. Should be dry to the touch in 5 minutes; may be painted approximately 6 hours after drying. Several thin coats are better than one heavy coat.

## TECHNICAL DATA

<b>Composition:</b>	Zinc, toluene, mineral spirits, propane, butane
<b>Type:</b>	Solvent based
<b>pH:</b>	N/A
<b>Flash Point</b>	
<b>Concentrate:</b>	81°F
<b>Spray:</b>	Extremely flammable
<b>Specific Gravity:</b>	1.15
<b>Toxicity:</b>	Moderate
<b>Color:</b>	Grey
