

LIBERATOR 600

Non-Selective Weed Killer

Typical weed control problems:

- ✓ Weeds, vegetation and grasses around and under fence rows, road signs, building edges, telephone poles, tank farms and bridge abutments.
- ✓ Weeds growing in open areas such as drainage ditches, parking lots, vacant lots, plant sites, railroad yards, alleys and garbage dumps.

LIBERATOR 600 is formulated to promote rapid top kill of existing vegetation, deep penetration of the vascular system and rapid absorption through the roots. This product is ready-to-use undiluted where bare ground is desired.

LIBERATOR 600 provides long-term residual control. Visible results can be seen in just a few hours after application. LIBERATOR 600's ingredients remain active in the soil for the entire growing season. This greatly reduces frequency of treatments, saving on labor and amount of chemical usage.

LIBERATOR 600 may be applied with power sprayers, compressed air hand sprayers, knapsack sprayers or an ordinary sprinkler can. No dilution or agitation is required.

APPLICATIONS

LIBERATOR 600 is a liquid non-selective weed killer designed for use where control of all vegetation is desired. It combines Bromacil (.98%), 2,4-D and aliphatic hydrocarbons to produce rapid top kill as well as translocation and root absorption by vegetation.

This weed killer is a ready-to-use solution designed to be applied undiluted as a spray on non-cropland areas where bare ground is desired. The degree of weed control and duration of effect will vary with the amount of product used, soil type, rainfall and other conditions. Apply any time of year except when the ground is frozen. Best results are obtained after predominant species are well established in late spring or early summer. Before treating, calibrate equipment to insure uniform coverage of area to be treated. Measure out the proper amount and apply. Coarse sprays are less likely to drift. More than two (2) broadcast applications per site per year are prohibited.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is intended for use around any property or facility that functions to provide a service to the general public or to public or private organizations, including hospitals, nursing homes; schools (other than pre-schools and day care facilities); museums and libraries; sports facilities; and office buildings. Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes. For use on plants in non-crop and non-timber areas only. Not for use on crops, timber, or other plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. Not for aerial applications.

GENERAL PRECAUTIONS & RESTRICTIONS: Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not enter or allow people (or pets) to enter the treated area until sprays have dried. Injury or loss of desirable trees or other plants may result from failure to observe the following: Do not apply, drain or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts or similar areas. Prevent drifts of spray to desirable plants. Do not contaminate domestic waters. Keep from contact with fertilizers, insecticides, fungicides and seeds. Thoroughly clean all traces of this concentrate from application equipment immediately after use. Flush tank, pump, hoses and boom with several changes of water after removing tips and screens (clean these parts separately).

This weed killer is a ready-to-use solution designed to be applied undiluted as a spray on non-cropland areas where bare ground is desired. The degree of weed control and duration of effect will vary with the amount of product used, soil type, rainfall and other conditions. Apply any time of year except when the ground is frozen. Best results are obtained after predominant species are well established in late spring or early summer. Before treating, calibrate equipment to insure uniform coverage of area to be treated. Measure out the proper amount and apply. Coarse sprays are less likely to drift. More than two (2) broadcast

applications per site per year are prohibited. Minimum of 30 days between applications.

General Weed Control: To control most weeds for an extended period of time on non-cropland areas, such as: parking lots, fence rows, loading ramps, railroad sidings, storage yards, around buildings and industrial plant sites, apply 0.9 gallons per 1,000 sq. ft. (39 gallons per acre). Controls annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, cheatgrass, broomsedge, ragweed, lambsquarter and turkey mullein, and other hard-to-kill perennial weeds and grasses, such as Johnsongrass, saltgrass, bouncing bet, bracken fern and horsetail.

Equipment: Power sprayers, compressed air hand sprayers, knapsack sprayers or an ordinary sprinkler can be used to apply. No dilution or agitation is required.

TECHNICAL DATA

ACTIVE INGREDIENTS:

2,4-Dichlorophenoxyacetic acid 2-ethylhexylester*1.09%
Bromacil (5-bromo-3-sec-butyl-6-methyluracil)0.98%

INERT INGREDIENTS97.93%

TOTAL100.00%

*2,4-Dichlorophenoxyacetic acid equivalent
.....0.70%

Type:	Herbicide
Specific Gravity:	0.88
Flash Point:	>130°F
Dosage:	Follow label directions
Equipment:	Poly-V Sprayer
Appearance & Odor:	Amber-brown liquid with solvent odor
