MELTDOWN II

Ice Melting Admixture

- ✓ Melts ice, frost and snow instantly and prevents refreezing
- ✓ Will not harm paint, plexiglass, metal or rubber
- ✓ Ideal for use on school buses, rail cars, taxis, highway equipment, other service trucks and any surfaces which have been exposed to the elements for prolonged periods

MELTDOWN II is a specially formulated liquid which quickly cuts through ice formation, melting it and creating water. MELTDOWN II converts this water to "antifreeze" which further enhances the melting process. This unique formulation removes ice, snow and frost. It also prevents refreezing on windshields, windows, headlights, doors and car and truck bodies.

APPLICATIONS

MELTDOWN II can be applied with a trigger sprayer, Sure Shot Sprayer or a Poly-V-Sprayer to free frozen locks, doors, hoods and trunks. It will not harm plexiglass, paint, metal or rubber. MELTDOWN II's fast-acting formulation removes ice and frost from snow plows, school buses, rail cars, taxis, highway equipment, other service trucks and any surfaces which have been exposed to the elements for prolonged periods. Further, when sprayed on a surface, MELTDOWN II will hinder ice formation and buildup during overnight exposure.

DIRECTIONS

1. Brush off loose snow.
2. Spray entire ice covered area, starting at top.
3. Allow product to set for a few minutes, depending upon exposure temperature.
4. Open doors, turn on windshield wipers and clear side windows as needed
NOTE: If windshield has heavy soil, MELTDOWN II may cause smearing when wipers are used. Rinse off with water or wipe with damp cloth.

TECHNICAL DATA

Type:	Ice melting admixture
Appearance:	Blue, clear liquid
Odor:	Alcohol
Flash Point:	77°F
Solubility:	Complete
