ASSAULT

Instant Kill Wasp & Hornet Spray

- ✓ **Quick Kill - Kills the Entire Nest**
- ✓ **Contains Permethrin and Tetramethrin Synergized with Piperonyl Butoxide**
- ✓ **Jet Spray - Reaches Nests up to 20 Feet Above Ground**
- ✓ **Kills with Residual Action as Wasps and Hornets Return to Nests**
- ✓ **Non-Conductive**
- ✓ **Dielectric Breakdown Voltage of 49,500 Volts**

ASSAULT is an instant kill wasp & hornet spray with a triple action formula of Permethrin, Tetramethrin & Piperonyl Butoxide that drops wasps, hornets and yellow jackets instantly and kills with residual action when they return to the nests.

ASSAULT can be used both indoors and outdoors on wasp & hornet nests.

ASSAULT shoots a 20-foot jet spray which enables a person to spray those hard to reach places. It has a Dielectric Breakdown Voltage of 49,500 Volts, and it contains no CFC's or other ozone depleting substances.

APPLICATIONS

ASSAULT is an instant kill wasp & hornet spray with a Permethrin, Tetramethrin and Piperonyl Butoxide formulation that drops wasps, hornets and yellow jackets instantly and kills with a residual action as they return to the nests. ASSAULT has a dielectric breakdown voltage of 49,500 volts. It features a jet spray that reaches nests up to 20 feet above ground and contains no CFC's or other ozone depleting substances.

Places of use for ASSAULT include:

Apartment Complexes • Amphitheaters • Lodging Facilities • Country Clubs • Schools/Universities • Golf Courses • Office Buildings • Parks

DIRECTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read Entire Label.

Do not use in commercial food/feed handling establishments, restaurants or other sites where food/feed is commercially prepared, processed, or served.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. Remove protective cap. Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill wasps, hornets and yellow jackets under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1-2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter such as outside plumbing, faucets, etc., and cracks or crevices in foundations as well as along sills and ledges. Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils. Avoid spraying vegetation directly.

TECHNICAL DATA

ACTIVE INGREDIENTS:

Tetramethrin	0.150%
Permethrin*	0.375%
Piperonyl Butoxide**	0.750%
OTHER INGREDIENTS***	98.725%
	100.000%

*Cis/trans ratio: min. 35% (+/-) cis and max. 65% (+/-) trans.

**Equivalent to min. 0.6% (butylcarbityl) (6-propylpiperonyl) ether and 0.15 % related compounds.

***Contains Petroleum Distillates.

Flammability:	Combustible
Specific Gravity:	0.81
Spray Pattern:	20 foot stream
Appearance:	Transparent oily liquid
Conductivity:	49,500 volts
Odor:	Insecticidal
