### **Recommended For Non-Crop Areas Such As:**

- ✓ Railroads
- ✓ Highways
- ✓ Pipelines
- ✓ Tank Farms
- ✓ Lumber Yards
- ✓ Fence Rows
- ✓ Parking Lots

BLITZ is a non-selective liquid general herbicide which is designed to be used where control of all vegetation is desired. It produces rapid kill of all succulent vegetation. Translocation and root absorption produce extensive root kill of weeds and provide long-term control.

This concentrate is an effective general herbicide for use on non-cropland areas for control of brush and many annual and perennial weeds, and is particularly useful for control of perennial grasses. It is a water-soluble liquid to be mixed in water and applied as a spray; this concentrate may be applied undiluted for basal (soil) treatment of brush. The degree of control and duration of effects will vary with the amount of chemical applied, soil type, rainfall and other conditions.
