CHAMP

**Nonflammable
Penetrating Oil**

...setting performance
standards worldwide...

- ✓ **Protects Against Rust And Corrosion On Metal**
- ✓ **Lubricates And Penetrates**
- ✓ **Loosens Rusted Nuts And Bolts**

APPLICATIONS

CHAMP is a nonflammable aerosol that stops and prevents corrosion. It also lubricates locks and hinges, snow removal equipment and refrigeration equipment. CHAMP may be applied to wet or dry surfaces. It loosens dirt, scale and other types of corrosion. CHAMP has a lubricating effect on all moving parts, and it never becomes dry, hard or brittle. The application of this product should be checked regularly and reapplied as conditions indicate.

CHAMP is recommended for use on airplanes, automotive vehicles, farm equipment, vending machines, laundry equipment, electrical equipment, motors and windings, controls, terminals, fuse and junction boxes, ignition systems, starter motors, distributor caps, spark plugs, alternators, multiple connections, switches and switchgear. It is ideal for use on steel, copper, aluminum, iron, brass, painted surfaces, bronze, plastics, ceramics, tools and machinery. CHAMP also frees nuts and bolts, stops corrosion on battery terminals and can be used on electrical panel boards, parking meters, home workshops and outboard motors.

DIRECTIONS

Spray liberally directly on area to be treated. Reapply periodically as required. To restore electrical equipment after total immersion: First, clean the equipment. Allow the water to run off, then spray into windings, saturating all insulation and metal parts. If foaming occurs, continue to coat until foam disappears. Repeat several times if necessary.

TECHNICAL DATA

Form:	Aerosol
Odor:	Light
Color:	Amber
Toxicity:	Low
Penetration Ability:	Excellent
Solubility in Water:	Not soluble
