

## Product Data

# CONTREAT

## Low pH Concrete Remover

### CONTREAT IS:

- ✓ A safe and unique concrete remover that acts and performs like mineral acid
- ✓ A product that can replace multi-acid blends
- ✓ Non-fuming
- ✓ DOT non-corrosive & non-regulated

CONTREAT is a low pH concrete remover that performs like mineral acid. It has a similar pH and pKa value as hydrochloric acid, but is non-fuming, non-corrosive to skin and metal (per DOT test protocols) and is DOT "Non Regulated". It is a unique 60% active organic salt that performs like hydrochloric acid as well as many other acids. CONTREAT offers significant benefits with regards to handling, storage and worker safety vs. hydrochloric acids and many other inorganic and organic acids. It is phosphate free and contains no volatile organic substances.

### Application Areas:

- Cement Mixers
- Cement Trucks
- Cement Forms
- Machinery
- Tools

## APPLICATIONS

CONTREAT has the ability to replace concrete removing formulations that contain blends of different acids, such as hydrochloric, phosphoric, sulfuric, sulfamic, citric and hydroxyacetic acid. Many existing concrete removers require a combination of these acids to achieve their optimum performance.

## DIRECTIONS

CONTREAT is a ready-to-use solution. Spray on concrete to be removed, allow to sit for a few minutes, then rinse off with water. Depending on accumulation, additional treatment may be required. Not recommended for painted surfaces.

## TECHNICAL DATA

<b>Composition:</b>	Organic salt, specialized surfactants
<b>Density (25°C):</b>	1.10
<b>Boiling Point:</b>	212°F
<b>Solubility:</b>	100% in water
<b>pH:</b>	<1.0
<b>Flash Point:</b>	None
