

DEEP BLUE SEE

Spray Pattern Indicator & Pond, Lake and Fountain Colorant

As a spray pattern indicator, DEEP BLUE SEE acts as a highly concentrated dye that can be used to mark agricultural spray solutions, thereby eliminating over sprayed or under sprayed areas.

DEEP BLUE SEE also enhances the natural beauty of ponds, lakes, fountains and lagoons by giving them a beautiful blue-green shade. DEEP BLUE SEE is harmless to humans and wildlife, and it will not disrupt fishing, swimming or irrigation when used as directed and after product is thoroughly dispersed.

- ✓ Non-toxic - harmless to humans and wildlife when used as directed
- ✓ Places of use include: golf courses, right of ways, cemeteries, parks, any turf or nursery application, ponds, lakes, fountains and lagoons
- ✓ Compatible with most herbicides, fungicides, pesticides, fertilizers & nutrients and algacides
- ✓ Easy to apply

APPLICATIONS

Spray Pattern Indicator: DEEP BLUE SEE eliminates overlapping or skipping of areas and also helps to indicate drift. It is designed for use on golf courses, right of ways, parks, cemeteries and any turf or nursery application. DEEP BLUE SEE is great for use with herbicides, fungicides, pesticides and fertilizers & nutrients.

Pond, Lake and Fountain Colorant: DEEP BLUE SEE adds a natural beauty to ponds, lakes, fountains and lagoons by coloring them to a more aesthetically pleasing blue-green shade. When applied at recommended rates, this product is harmless to humans and wildlife. Once DEEP BLUE SEE has thoroughly been dispersed, it will not disrupt fishing, swimming or irrigation. However, do not swim, fish or irrigate from ponds treated with DEEP BLUE SEE until the product has thoroughly dispersed.

DIRECTIONS

Spray Pattern Indicator: Add DEEP BLUE SEE to water-based spray solutions at the rate of 16 ounces per 100 gallons of spray. Since turf height and color may vary, this ratio may be adjusted. The use of rubber gloves is recommended.

Pond, Lake & Fountain Colorant: Apply DEEP BLUE SEE to ponds and lakes at the rate of between 1 and 2 gallons per acre of water 4 feet deep. Add DEEP BLUE SEE from several locations to insure even dispersal. The use of rubber gloves is recommended.

TECHNICAL DATA

Composition:	Blue dye
Density:	8.92 lb/gal
Solubility in	
Water:	Completely soluble
Appearance:	Dark blue liquid
