

# LEMON-DROP

## Bacterial Hard Surface Floor Cleaner/Drain Maintainer

LEMON-DROP is a liquid concentrate bacterial floor cleaner and drain maintainer that is ideal for use on hard grouted/tiled bathroom or kitchen floors. LEMON-DROP's effective biological cleaning system uses powerful surfactants to clean the surface immediately, while depositing bacteria into hard-to-reach areas of grout and tile to digest grease, oils, organics and fats that are embedded into tile and grout surfaces.

The remaining LEMON-DROP solution can be emptied down floor or kitchen drain lines where it will act as a drain maintainer or grease trap treatment. Its concentrated formula is designed to be diluted 4-8 oz. per mop bucket, and each application leaves behind a pleasant lemon fragrance.

- ✓ Utilizes Powerful Waste Digesting Abilities of Selected Beneficial Bacterial Cultures
- ✓ Prevents Accumulation of Sludge, Scum, Grease and Other Organic Solids On Grout and Tile Floors
- ✓ Breaks Down and Digests Proteins, Carbohydrates, Animal and Vegetable Fats, Oils and Cellulose From Drains, Grease Traps and Septic Systems

...setting performance  
standards worldwide...

## APPLICATIONS

LEMON-DROP uses specifically selected bacteria to attack, break down and digest residual organic material on hard floor surfaces, leaving behind a truly clean and fresh application area. It is highly effective as a mop solution on hard tile and grout floors to prevent the accumulation of odor-causing organic material such as proteins, carbohydrates, animal and vegetable fats, oils, grease and cellulose.

LEMON-DROP is also recommended to be emptied down floor or sink drain lines after use where it will act as an effective drain maintainer and grease trap treatment. LEMON-DROP will clean and deodorize mop heads if left in solution overnight.

## DIRECTIONS

Add 4-8 ounces of LEMON-DROP to mop bucket and fill with water, then mop application surface - no rinsing required. Empty remaining mop solution down floor or sink drain lines where LEMON-DROP will act as an effective drain maintainer and grease trap treatment.

## TECHNICAL DATA

<b>Appearance:</b>	Yellow liquid
<b>Fragrance:</b>	Lemon
<b>pH:</b>	8.5 +/- .5
<b>Effective Temperature Range:</b>	45 - 130°F
<b>Storage Stability:</b>	2 years

Concentrate - 200 billion per gallon
