

Product Data

Planet Green Products Floor Wax

Advantages Over Conventional Metal Interlock Finishes:

- Great Removability
- Faster Drying Time
- Better Durability
- No Ammonia Odor
- Better Re-Coatability

ATCO's Planet Green Floor Wax is based on the latest metal-free technology. It has a hard acrylic formulation, providing very high put-down gloss and good durability. It may be used with conventional low-speed or mop/recoat programs as well as with high speed burnishing equipment.

- ✓ DfE Recognized for Safer Chemistry
- ✓ Safer Choice - Meets U.S. EPA Safer Product Standards
- ✓ Hard/Zinc-Free Polymer
- ✓ Excellent Put-Down Gloss
- ✓ Excellent Removability

DIRECTIONS

Application (New or Existing Floors): Thoroughly strip floor with ATCO's Planet Green Floor Stripper. Rinse floor thoroughly with clean water. Apply a sealer base (optional) to worn floors or high traffic floors to improve wear resistance and enhance gloss. Apply Planet Green Floor Wax in uniform thin coats, allowing time to dry thoroughly between coats. If a sealer is used, apply up to four coats. If a sealer is not used, apply four coats for best results. Allow for longer drying time in damp weather.

MAINTENANCE

Sweep as necessary. Damp mop or scrub lightly with a mild, neutral detergent. Spray buff or buff lightly with appropriate pad. Also excellent for high-speed buffing. In high traffic areas, re-coat worn spots as necessary.

TECHNICAL DATA

Specific Gravity:	1.02
Solids:	20%
pH:	7.5
Leveling:	Excellent
Film Formation:	Excellent
Gloss:	Excellent
Water Resistance:	Excellent
Detergent Resistance:	Excellent
Removability:	Excellent
Black Heal Mark Resistance:	Very good
Appearance:	White emulsion
Odor:	Mild acrylic
