REO-MINT

Surface and Space Re-Odorizer

What Does It Cost You To Use Ordinary Deodorizers?

Costly Multi-Product Inventory and Chance of Misapplication

Most Deodorizers Are a Perfume Mask That Only Cover Up Odor

Low Concentration of Active Ingredients

Some Deodorizers Contain Hazardous Solvents

REO-MINT...Performance in Action

● **MULTI-PURPOSE CLEANER AND DEODORIZER.** REO-MINT removes the source of odors as it cleans. The cleaning action does not stop at the drain level. When flushed, REO-MINT's cleaning ingredients remain active and help destroy odor-producing matter in the drain system.

PERFORMANCE BENEFIT: A multi-purpose cleaner and deodorizer eliminates the need to store a wide range of surface renovators and deodorizers.

● **NEUTRALIZES MALODORS.** REO-MINT eliminates odors by breaking down the molecular structure of odor sources. Unlike conventional deodorizers, REO-MINT is not a perfume mask that covers up odors. It has the unique ability to attack odor molecules and neutralize them.

PERFORMANCE BENEFIT: In most cases, even in heavy usage areas, REO-MINT's deodorizing power eliminates the need for additional deodorants. Step saving. Time saving.

● **ECONOMICAL.** For general maintenance, REO-MINT can be diluted with up to four parts water for maximum economy and high cleaning efficiency. For air re-odorizing, it can be diluted up to 10 parts water. Disperses instantly in water to make a powerful solution to renovate surfaces.

PERFORMANCE BENEFIT: Higher cleaning efficiency and significantly lower cost per application.

● **SAFE TO USE.** REO-MINT removes most odor-causing surface bacteria, and without the side effects of acids. It contains no caustic or acidic ingredients.

PERFORMANCE BENEFIT: No abrasive substances present to damage application surfaces. No harmful effects to environment or workers.

APPLICATIONS

REO-MINT is a powerful, dual-action surface and space re-odorizer. It removes sources of odors as it cleans by using environmentally safe, non-toxic bacteria to actually digest the sources of the malodors.

REO-MINT gives hospital-standard cleanliness to all hard surfaces. It is used in nursing homes, schools, jails, apartments, funeral homes, kennels, doctor offices and clinics, hospitals and large and small industrial plants. In addition, it is specially formulated to renovate and deodorize all types of waste receptacles and refuse equipment: RV and marine digesters, septic tanks, drain lines, dump stations and waste water treatment areas.

DIRECTIONS

Surface Odors: For odors caused by urine, vomit, spoiled foods, animal wastes, or from any organic source, spray REO-MINT directly on the source of the malodor. The odor is immediately neutralized and a pleasant fragrance remains.

Space Deodorizer: Dilute REO-MINT with up to 10 parts of water and spray entire area in a fine mist.

General Cleaning and Deodorizing: Dilute 1 quart of REO-MINT per gallon of warm water. Clean surface areas thoroughly and allow solution to soak in and air dry. When area is dry, surface can be treated again if necessary.

Carpet Deodorizer: Dilute 4-6 ounces of REO-MINT in warm water solution. This application will eliminate pet odors, mildew and most organic odors by digesting the odor at its source.

TECHNICAL DATA

Composition:	Purified bacteria with wetting agents
Type:	Deodorizer and surface renovator
pH:	6.5-7.5
Water Solubility:	Emulsifies
Storage Stability:	1 Year
Color:	Green
Fragrance:	Mint
