SCORCHED EARTH

Super Weed Killer Concentrate

Applications:

- Around Buildings
- Fence Lines
- Foundations
- Cemeteries
- Rail Lines
- Roadways
- Recreation Areas
- Lumber Yards
- Storage Facilities
- Other Areas Where
the Total Kill of
Vegetation is Needed

SCORCHED EARTH with Prometon is a liquid vegetation killer intended for use after dilution with water or an appropriate solvent. It provides total weed control in specific areas where no plant growth is desired for up to one year.

SCORCHED EARTH controls bindweed, common mullein, oatgrass, downy brome grass and hard-to-kill perennial broadleaf and grass weeds. To cover 100 sq. ft., add 10 - 15 2/3 fl. oz. by use of a sprinkling can or other watering or spraying device in sufficient water to get good coverage of the area (e.g., 2 1/2 gals. in sprinkling can).

- ✓ Non-Selective Herbicide With Prometon
- ✓ Provides Total Kill For Up to a Year
- ✓ Fast Acting
- ✓ Long Lasting
- ✓ Dilutable With Water, Fuel Oil, Petroleum-Based Oil, Mineral Oil, Diesel Fuel, or Kerosene

APPLICATIONS

SCORCHED EARTH super weed killer concentrate is designed for total weed control on certain areas around the business or workplace where no plant growth is desired. Controls bindweed, common mullein, and other hard-to-kill weeds. Prevents plant growth for up to one year.

SCORCHED EARTH contains Prometon, a highly effective herbicide that is used to control annual and perennial broadleaf and grassy weeds. Prometon is absorbed by the leaves and the roots of the plant and is transported throughout the plant. Prometon inhibits photosynthesis, and the plant quickly dies. It remains in the soil and usually inhibits plant growth for up to a year. SCORCHED EARTH is highly effective when diluted with water or other solvents.

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling. For control of annual and broadleaf weeds such as downy brome grass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod, plaintain, bindweed, johnsongrass, common mullein and wild carrot. To cover 100 sq. ft., add 10 - 15 2/3 fl. oz. by use of a sprinkling can or other watering or spraying device in sufficient water to get good coverage of the area (e.g., 2 1/2 gals. in sprinkling can). **Maximum application rate is 15 2/3 fl. oz. per 100 sq. ft. per year.** Different grades of mineral oil, diesel fuel, petroleum-based-oil, fuel oil, or kerosene may be substituted for water.

When using a sprinkling can, triple rinse and pour rinsate on area treated once application is completed. Mix only the quantity needed and use immediately. To minimize lateral movement, sprinkle lightly with a watering can or similar sprinkler device immediately after application.

PRECAUTIONS: (1) Apply when air is calm to avoid the possibility of drift onto desirable plants or grass. (2) Keep away from the roots of desirable plants and trees. (3) Use only in areas where complete control of vegetation is desired. (4) **THIS WEED KILLER CONCENTRATE SHOULD NOT BE USED ON CULTIVATED AREAS, ON GROUND THAT IS TO BE CULTIVATED, IN GREENHOUSES OR NEAR THE DRIP LINE OF TREES OR**

areas where runoff is likely to occur (apply only to level surfaces). (6) Avoid using where adjacent desirable trees, shrubs, or plants may be injured from leaching of the chemical through the soil. (7) Keep children and animals off treated areas until these areas are dry.

TECHNICAL DATA

ACTIVE INGREDIENT:

Prometon: 2,4-Bis(Isopropylamino)-6-Methoxy-S-Triazine 3.75%

INERT INGREDIENTS 96.25%

TOTAL 100.00%

Type:	Herbicide
Specific Gravity:	0.87
Flash Point:	110°F
Dosage:	Follow label directions
Equipment:	Poly-V Sprayer
Appearance & Odor:	Clear yellowish liquid with solvent odor

APPROVALS

EPA Reg. No. 3862-91-13051
