Companies
- Highway
Departments
- Prison Facilities

SWELL-GEL is a gel room odor counteractant that sprays on as a liquid, clings as a gel, then lasts for hours. It provides long-term odor control in any problem area. SWELL-GEL can be used on walls, floors, carpet, air intakes, trash receptacles, around urinals and commodes, under sinks and anywhere else odor is a problem.

✓ Sprays Like a Liquid and
Clings Like a Gel

✓ Contains a Fresh, Clean
Fragrance

✓ Provides Long-Lasting Odor
Control

...setting performance
standards worldwide...

APPLICATIONS

SWELL-GEL is ideal for high-traffic areas where a long-lasting fragrance is desired. Traditional air freshening sprays are thin and float in the air. As the air flow carries them away, the air freshener dissipates and become less effective at ridding areas of odors. SWELL-GEL sprays as a liquid, clings to areas like a gel, and slowly evaporates, producing a long-lasting and pleasant fragrance.

Areas of Use For SWELL-GEL: SWELL-GEL can be used on walls, floors, carpet, air intakes, trash receptacles, around urinals and commodes, under sinks and anywhere odor is a problem.

DIRECTIONS

Shake well before using. Spray a fine mist on hard/porous surfaces, such as ceiling tiles, carpets, walls, bricks, concrete blocks, etc. SWELL-GEL works ideal when sprayed above ceiling fans or on air conditioner filters. Reapply after product vaporizes and more odor control is desired.

TECHNICAL DATA

Appearance: Opaque yellow liquid
Fragrance: Floral
