

Concentrated Hand Dishwashing Liquid

TRIM is a super concentrated hand dishwashing liquid formulated to leave utensils, dishes, pots, pans and glassware sparkling clean and streak free. The moderate pH and lotioning agents are kind to skin, yet TRIM rapidly cuts grease and dried-on food deposits. It is recommended for food service applications in commercial restaurants, institutional kitchens, hotels and motels, hospitals, delis, supermarkets, etc.

- ✓ Dissolves Instantly In Water
- ✓ Highly Concentrated
- ✓ No Residual Film

APPLICATIONS

Pleasantly scented TRIM is a super concentrated hand dishwashing liquid formulated for commercial and institutional food service operations. TRIM is used in institutional kitchens, hospitals, nursing homes, schools and in commercial establishments such as supermarkets, delis, hotels, motels and restaurants.

DIRECTIONS

1. Add TRIM to dishwashing tank at the rate of ¼ to 1 ounce per gallon of warm water (90°F to 110°F). The exact amount of TRIM required will depend upon the load volume and the level of soiling.
2. Agitate the load to loosen encrusted soils.
3. Remove load from solution and rinse with clean water. Allow to air dry.

TECHNICAL DATA

Composition:	Biodegradable surfactant blend
Type:	Anionic, nonionic blend
pH:	8.5-9.5
Toxicity:	Low
Flammability:	None
Equipment:	ATCO Meter Proportioner
Fragrance:	Lemon
Color:	Green
