VANDEX

Vandalism Mark Remover

Areas of Use

Include:

- Highway
Departments
- Schools
- Correctional
Facilities
- Apartment
Complexes
- Housing
Authorities
- Marinas
- School Bus
Garages
- Municipalities
- Hotels/Motels
- Public Buildings

VANDEX is a unique vandalism mark remover. It removes crayon, pencil, lipstick, spray paint, fingerprints, scuff marks, scotch tape marks, ball point inks and masking tape. The gel formulation allows VANDEX to stay put and work rather than dripping and running off of the work surface.

- ✓ Gel Formulation - Holds to Vertical Surfaces
- ✓ Safe On Most Surfaces
- ✓ Contains a Fine Powder Which Assists in Rubbing Out Stubborn Marks
- ✓ Fast Cleaning Action

standards worldwide...

APPLICATIONS

VANDEX may be used on many surfaces: fiberglass, brick, concrete, ceramic tile, aluminum, steel, brass, glass, chrome, enamels, varnishes, porcelain and formica. Care should be exercised when using on synthetic surfaces which are susceptible to solvent damage (asphalt, tile, rubber, some paints and some plastics). Pre-test in hidden area if uncertain.

Usage: highway signs, public restrooms, school corridors, desk tops, elevators, vehicles, lockers, hallways, hotels/motels, housing authorities, correctional facilities, bridges, athletic departments and apartment complexes.

DIRECTIONS

Spray onto marks. Wait 5-10 minutes. Remove with clean cloth. If stubborn stains remain, repeat application. Allow to stand 30 to 60 minutes. If accumulation is heavy, remove with spatula, then spray again. If extreme stubbornness is encountered, use stiff bristle brush and work into the stain. Spray on and wipe off again. Use clean brush or cloth.

TECHNICAL DATA

Composition:	Solvent/surfactant blend
Type:	Solvent emulsion
pH:	10-11
Flammability	
Concentrate:	64°F
Toxicity:	Low
Biodegradable:	Yes
