WITH **Lotion Hand Cleaner** **With Pumice**

WITH Lotion Hand Cleaner is a petroleum solvent-free, natural formulation that has been developed to address environmental and safety concerns.

Premium natural citrus oils blended with hard working surfactants safely and effectively dissolve the very toughest soils. This super fast-working cleaner is pH balanced and biodegradable. WITH Lotion Hand Cleaner is fortified with glycerin to help keep your hands soft and smooth.

**...setting performance
standards worldwide...**

APPLICATIONS

WITH contains a high-quality, fine-ground, American pumice to speed removal of all types of stubborn soil without harsh chemicals. Its premium, heavy-duty cleansing agents safely and effectively dissolve grease, paints, inks and many other hard to remove soils. Fortified with skin conditioners, this VOC-free formula conditions hands to help keep them soft and smooth.

This product is designed specifically to be used in ATCO's Get-With-It Dispenser. This patented dispenser features the following benefits:

- Easy, quick-changing, no mess refill tank empties 100% - NO WASTE
- Reservoir back-up allows reloading at your convenience
- Time-tested, heavy-duty pump mechanism is guaranteed for life
- See-through window lets users know when refill can be changed
- Product's foil seal locks in freshness and eliminates tampering
- Snap-in/snap-out features lock reservoir and refill tank in place

DIRECTIONS

For product: Apply a small portion to hands and rub gently. Rinse with water and dry. If no water is available, wipe with a clean cloth or paper towel.

For inserting product refill into GET-WITH-IT Dispenser: Back-plate of Get-With-It Dispenser is mounted to wall. Dispenser/reservoir unit locks into bottom portion of mounted plate. With foil seal down, align product refill with middle and upper tracks on back-plate (Figure 1). Remove cap, invert and slide container into wall-mounted back plate of dispenser. **Do not remove seal. Do not puncture container.** Refill is pushed in and slid down into tracks, locking it into position which breaks the foil seal (Figures 2 and 3). WITH flows into reservoir, emptying completely during use with no waste. When empty, WITH refill can be changed at maintenance personnel's convenience, as a full 1000 ml of product will be left in the reservoir. You get 1,444 dispensings from each 4000-ml refill.
