

## Product Data

# X-TRACT

## Industrial Carpet Extractor and Cleaner

### Places of Use Include:

- Hotels/Motels
- Hospitals
- Office Buildings
- Municipalities
- Nursing Homes
- Schools
- Anywhere Stains are a Problem

X-TRACT is an industrial carpet extractor and cleaner. Its powerful formulation works quickly on a variety of organic stains, including coffee, soft drinks, dirt, juice and blood, among others. X-TRACT returns carpets to a like-new appearance and does not leave behind soil-attracting residues.

- ✓ Effectively Cleans Carpets and Neutralizes Odors
- ✓ Safe to Use on Most Colors
- ✓ Returns Carpets to a Like-New Appearance
- ✓ Ideal Product For High Traffic Areas

# APPLICATIONS

X-TRACT industrial carpet extractor and cleaner works quickly on a number of stains, including coffee, soft drinks, dirt, juice and blood, among others. It effectively cleans carpets, while at the same time neutralizing odors. X-TRACT is safe to use on most colors and surfaces, returning carpets to a like-new appearance. X-TRACT is ideal for high-traffic areas, as it leaves no soil-attracting residues behind.

## DIRECTIONS

**Using Hot Water Extraction Machine:** The preferred method for optimum cleaning is to pre-spray the carpet with the cleaning solution and then use the carpet extraction machine with just clear water in the tank to rinse and extract the cleaning solution and soils from the carpet.

Prepare the cleaning solution, using 10 oz. of X-TRACT per gallon of warm water (for heavily soiled areas, use 24 oz. per gallon). Apply this solution to the carpet, using ATCO's Poly-V Sprayer (other garden-type pump-up sprayers will work), at a coverage rate of 1 gallon of cleaning solution per every 500 sq. ft. of carpet area. Allow the solution to remain in the carpet for 10 minutes and then remove with a hot water extraction machine, using only clear, clean water in the solution tank to rinse the carpet and remove the excess cleaning solution with the soils. Let carpet dry completely (usually 12-24 hours, depending on temperature and humidity) before opening area to traffic.

X-TRACT may also be used with the traditional method of Hot Water Extraction by mixing 2 oz. of X-TRACT per gallon of hot water in the solution tank of the extraction machine. Clean the carpet in the usual way and allow it to dry completely before opening to traffic. If this method of cleaning is used rather than the preferred method described above, it may be necessary to pre-spray spots or stains on the carpet with the cleaning solution before cleaning.

**Using Bonnet Cleaning Method:** X-TRACT may be used effectively when using the bonnet method for cleaning carpets. Prepare the cleaning solution by mixing 2-10 oz. of X-TRACT per gallon of warm water (for heavily soiled areas, use 24 oz. per gallon) in a clean mop bucket equipped with a wringer. Soak a clean bonnet in the solution and wring out the excess solution. Place the bonnet under a slow speed floor machine or carpet spin

cleaning machine and go over the carpet. For best results, turn bonnet over often and keep it wet with the cleaning solution. Change bonnets frequently as they become soiled. Allow carpet to dry completely before opening to traffic.

## TECHNICAL DATA

<b>Appearance:</b>	Orange/ clear liquid
<b>Type:</b>	Carpet extractor and cleaner
<b>Flammability:</b>	Non-flammable
<b>pH:</b>	3.81
